

STEPS FOR THE AUTHORS AFTER RECEIVING REVIEWS

General statement: submissions are “accepted subject to amends”, i.e. assuming that they address the comments appropriately, they are automatically accepted for the proceedings and expected to present. In other words: authors should register for the conference and accommodation ASAP while revising their submissions at the same time.

These are the particular steps the authors have to follow after receiving the reviews for the abstracts/ papers (these are also valid for people who submitted abstracts in the first phase, i.e. till May):

- 1) If the reviewers provided any remarks concerning the abstract/ paper (even only a single secondary one) please revise the abstract/ paper according to the remarks of the reviewers. If the remarks refer to the presentation, then you do not need to revise it
- 2) Submit the revised abstract/paper to the system before October 5th in order to be included in the proceedings
- 3) As soon as steps 1 and 2 are done, your abstract/ paper is considered to be accepted
- 4) Please register ASAP, preferably before October 5th (which is also the early bird deadline)

If the reviewers did not make any remarks with a strong accept (note 3), you should skip steps 1 and 2.
